BioAssetPro — finance confirmation sheet

Your books will be set up on the chart of accounts in your own posting-engine workbook (*YIFRE_Posting_Engine_Final_Implementation_Ready_01102026.xlsx*) — 137 five-digit accounts, with its 57 cost centres. The system starts empty: no balances are carried over, so there is no crosswalk to approve.

Below is everything the workbook did not settle. Each has a recommendation already built and tested. Tick *agreed* to keep it, or tick *change it* and say what you want instead. Nothing here blocks your staff from using the system — it decides which account a posting lands in.

Accounts added where the workbook had none

1. Impairment loss on equipment

As built: 52800 Impairment loss — property, plant and equipment. The workbook has no fixed-asset impairment account (51200 is inventory write-down, 52400 is depreciation).

☐ agreed

Or: Name a different account

☐ change it

2. Capitalised variance — finished goods and work in progress

As built: 12490 Finished goods — capitalised variance and **13190** Work in progress — capitalised variance, kept separate so the variance can be reviewed at period end.

☐ agreed

Or: Fold the variance into the inventory accounts instead (12410 / 12420 / 12450 and 13110 / 13120 / 13200)

☐ change it

3. Eggs held in incubation

As built: 13020 Poultry farm work-in-progress control.

☐ agreed

Or: 16032 immature livestock, or 12420 finished poultry products

☐ change it

Posting policies

4. Supplier invoice priced above or below the goods receipt

As built: Absorbed into the cost of the stock, with the stock ledger revalued; any share already used goes to cost of sales.

☐ agreed

Or: Expense it to 53000 Material price variance

☐ change it

5. Material consumed in processing

As built: Credited to **12000** Raw materials, the workbook's own processing consumption rule.

☐ agreed

Or: Credit 12200 by item class

☐ change it

6. Finished feed and farm feed issues

As built: Finished feed held in **12450**; farm feed issues credit **12100**.

☐ agreed

Or: A single feed inventory account

☐ change it

7. Production overhead pool

As built: One utilities account, **52200**.

☐ agreed

Or: Split across 52200 / 52300 / 52400

☐ change it

8. Recovery variance

As built: 53500.

☐ agreed

Or: Split by nature across 53000–53600

☐ change it

9. Income tax expense

As built: 58000 against 20900 payable.

☐ agreed

Or: Name a different account

☐ change it

Which stages count as immature

10. Poultry — immature is carried in 16032, mature in 16042

As built: Immature: Chick, Grower, Pullet, Cockerel. Mature: Market-ready, Point-of-lay, Layer, Broiler, Breeder.

☐ agreed

Or: Move one or more stages to the other side

☐ change it

11. Snails — immature is carried in 16031, mature in 16041

As built: Immature: Egg, Hatchling, Juvenile, Grower. Mature: Market-ready, Breeder.

☐ agreed

Or: Move one or more stages to the other side

☐ change it

Thresholds currently in the system

12. Who may approve what, by value

As built: Farm Manager to ₦250,000 · Finance Manager to ₦2,000,000 · Finance Controller to ₦10,000,000 · MD/CEO above that.

☐ agreed

Or: Set your own limits

☐ change it

13. Death rate that needs an abnormal-mortality approval

As built: 2% of the population.

☐ agreed

Or: Set your own rate

☐ change it

Anything to change — write the number and what it should be:

Confirmed by	Role	Date

Return this sheet and the choices are applied before go-live. Where a choice changes an account, the change is recorded against your name in the system’s audit trail.
